

Significant Changes to the IBC 2009 Building Code

1.0 AIA Learning Unit 1.0 PDH 1.0 Health and Safety Unit

Froehling & Robertson, Inc. is pleased to provide an AIA approved presentation addressing the "SIGNIFICANT CHANGES" in the updated IBC 2009 Building Code. The purpose of this presentation is to familiarize design professionals, building officials, plans examiners, special inspectors, contractors, construction managers, and others in the design and construction industry with some of the more important code changes included in IBC 2009. This free one hour seminar is available to groups of all sizes and includes reference material handouts.

Presentation Highlights

- **Institutional Occupance Code** - What are the changes in IBC 2009, Table 1604.5?
- **Group R-3 Special Inspections Exemption** - For which projects has IBC 2009 deleted this exemption?
- **Code Clarification** - How does it affect stability analysis and load combinations for retaining walls?
- **Structural Steel Table 1704.3** - How does the code update expand the language on snug tight bolts and trusses?
- **Concrete Table 1704.4** - The updated guidelines regarding anchors installed in hardened concrete.
- **Masonry Table 1704.5** - How was it expanded to incorporate and clarify new ACI 530-08 and 530.1-08?
- **Changes to the Soils Section** - How do they affect geotechnical reports and contract documents ?
- **Helical Pile Foundations** - A new addition to the Code.
- **Sprayed Fire-Resistive Materials** - What's new?
- **Geotechnical Criteria** - How has it been reorganized and clarified in Sections 1803-1804?
- **Section 1705 Statement of Special Inspections** - The addition of seismic-force-resisting systems to the Code.
- **Deep Foundations** - New Criteria introduced in Section 1810.3.5.2.3 (micropiles).

F&R's free AIA presentations are ideally suited for lunch and learn seminars. For more information please contact:
