

International Building Code 2009

“Addressing Code Compliance”

1.0 AIA Learning Unit and 1.0 Professional Development Hour

Froehling & Robertson, Inc. is pleased to provide an AIA approved presentation addressing primary code issues in the specific disciplines of soils, concrete, masonry, structural steel, and sprayed fire-resistant materials. This free one hour seminar is available to groups of all sizes and includes reference material handouts.

Presentation Highlights

Special Inspections - Code Requirements

- **Code History** - Southern Building Code to BOCA to IBC 2000, IBC 2003, IBC 2006, and IBC 2009.
- **Special Inspections** - Which are mandatory for soils, concrete, masonry, EIFS, steel, sprayed fire-resistant materials, and others?
- **Code Rules** - Obtaining building permits and certificates of occupancy.
- **Code Inspections** - What is the REAL difference between “periodic” and “continuous” code inspections and which materials and processes require each?
- **Do’s and Don’ts** - The potential pitfalls of the geotechnical and soils phases of the project.
- **Geotechnical Reports** - Which structures require a geotechnical report to comply with IBC 2009?
- **Steel Fabrication Shop Inspections** - How to comply with IBC 2006.
- **The NEW Masonry Code** - How does ACI 530-05 apply?
- **Engineered Masonry Inspection** - What are possible testing program pitfalls?
- **Tracking Discrepancies** - How to avoid outstanding inconsistencies at project’s end.
- **New IBC 2009 Criteria** - What’s new regarding deep foundations, seismic, and MEP?

F&R’s free AIA presentations are ideally suited for lunch and learn seminars. For more information please contact:
