

# Environmental Services

The Environmental Services Division of Froehling & Robertson, Inc. is comprised of an interdisciplinary team of engineers, geologists, hydrogeologists, environmental scientists, hydrologists, and industrial hygienists working together to meet our clients' particular needs. This interdisciplinary approach allows for a rigorous evaluation of environmental challenges and fosters innovative turn-key solutions. With in-house environmental drilling services, F&R is able to deliver comprehensive and complete environmental services in a timely, efficient, and cost-effective manner.

With decades of experience, F&R has the breadth of knowledge needed to resolve the most pressing environmental challenges. Our project teams have conducted wetland investigations, developed site characterization plans, implemented restoration projects, and resolved remediation issues for our clients. We assist clients in the private and government sectors to manage and mitigate environmental risks and liabilities by identifying problems, evaluating the impacts, developing mitigation strategies, and providing effective solutions. The F&R Environmental Services Division is committed to providing environmental solutions through quality client service performed on schedule and within budget.

## Engineering and Remediation

- Remedial Investigation and Feasibility Studies
- Remedial Design and Construction
- Remediation Monitoring and Optimization
- Brownfield Development
- Benchscale and Pilotscale Studies
- Landfill Design and Monitoring
- Landfill Closure
- Landfill Permit Monitoring/Sampling
- Landfill Methane Gas and Groundwater Monitoring Well Installation

## Environmental Investigation

- Phase I & II ESAs, Due Diligence
- Brownfield Evaluation
- UST/AST Assessments and Closures
- Property Condition Assessments

# Environmental Services

---

## Water and Wastewater Management

- Stormwater Management
- NPDES Permitting
- On-Site Wastewater Services
- Groundwater Monitoring
- Compliance Audits
- Hydrology/Water Quality

## Environmental Planning and Assessment

- Wetland Delineation
- Wetland Permitting
- NEPA – EIS
- Biological Resources
- Cultural Resources
- SPCC/ODC Plan Development
- Hazardous Waste Management
- Stream Assessment
- Ecological Restoration

## Risk Assessment and Exposure

- Pathway Analysis
- Bioaccumulation Studies
- Risk-Based Remediation and Restoration

## Soil Science and Management

- Geotechnical Consultation
- Soil Treatability Testing

## Natural Resource Damage Assessment (NRDA)

- Strategic Guidance
- Injury Assessment
- Injury Allocation
- Habitat Equivalency Analysis (HEA)
- Litigation Support

## Industrial Hygiene Services

- Asbestos Inspections
- Asbestos Management Plans
- Asbestos Abatement Specifications
- Asbestos Abatement Monitoring & Oversight
- Lead-Based Paint Surveys and Specifications
- Compliance Audits
- Indoor Air Quality Assessments
- Noise Evaluations
- Air Quality and Title V Permitting
