

LIFE OF SITE PLANNING

Part of F&R's Landfill Operational Training Program

At F&R we believe that improving knowledge of landfill operations leads to more obtainable and sustainable short and long-term objectives for your facilities. To that end, we have developed a series of FREE half-day training sessions and discussion events designed to give managers, operators, and industry consultants an opportunity to expand your base of professional knowledge by focusing on improving efficiency and profitability in a variety of areas.

Life of Site Planning for your facility is critical to achieving the operational needs of your landfill in an efficient and cost effective manner. F&R's Life of Site training will guide participants through every stage of landfill development, from conception through post closure, while hitting the highlights of capital project spending as well as operational budgets. **At the completion of this seminar, all attendees should be able to prepare Life of Site Plans for their facilities.**

Presentation Highlights

- Life of Site Planning - Why it Matters?
- Capital vs. Expense, Budgets, etc.
- Capital Projects: Infrastructure, Cell Construction, Gas Systems, Capping, and Equipment Purchases
- Operations: Equipment Maintenance, Leachate Treatment, Landfill Gas O&M, Daily Cover, Payroll, and Utilities
